HOSPITAL MANAGEMENT INFORMATION SYSTEM

RH/RWF has successfully implemented all the modules of HMIS, an integrated clinical information system with the basic objective of improved hospital administration and patient healthcare.

Doctors are able to achieve faster delivery of service with clinical knowledge support. The patients have the benefit of accessing all their medical records related to the OPD Registrations, Doctor Prescriptions, Lab Reports etc. on their mobile device.

Patients can self register with QR codes available in the hospital via HMIS Mobile App.
